The amendment received 3/10/06 has been made of record. Claims 1-14 are pending.

The rejections under 35 USC 112 made in the previous office action are withdrawn in view of applicants' amendments.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Skelhorn.

Skelhorn discloses calcium carbonate agglomerate with applicants' claimed particle size for addition to thermoplastic. The calcium carbonate is taught as suitable surface treated with fatty acids, for example. While the reference may be silent with respect to applicants' claimed surface area, tensile strengths and apparent density, values such as claimed instantly are seen as inherent to the agglomerates of the reference.

Applicants need supply factual data in affidavit form demonstrating patentable distinct properties over those of the reference.
